

# 360 Video Doorbell X3

# Radar sensor

Radar sensor offers ultra-precise detection to pick up movement and track object trajectory, to avoid false alarms from traffic or pedestrians. The 360 X3 let you customize the detection zone, so you can make sure it's watching only the areas you intend it to, without recording vehicles or pedestrians passing by.

## 5MP Ultra HD Camera

The 360 X3 features a state-of-the-art 5 Megapixel High-Resolution Camera to capture and preserve video in stunning 2496\*1920 resolution so that you can even see the license plates on cars.

4:3 Aspect Ratio

# Free Wi-Fi base station with Chime and 8GB local storage

It provides free 8GB local storage that is capable of storing up to 120-day videos or snapshots for you to review, download and share at your convenience. You have free and full access to the local storage! And it also serves as a dual-band Wi-Fi amplifier with up to 984ft range, extending your Wi-Fi coverage throughout your home, and ensuring two-way audio and visual calls through your doorbell are never dropped.

8GB  
Local Storage

120-day  
videos to review

Dual-band  
Wi-Fi amplifier

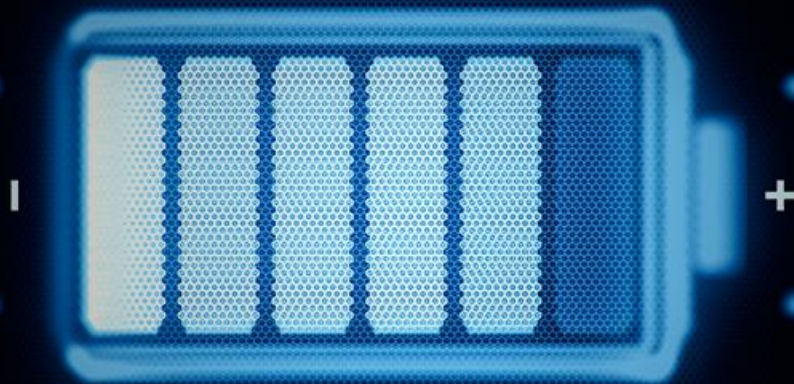

\*The 120-day is tested when the doorbell records 10 motion clips every day and records for 15s every time.

\*The range is tested in an open and unobstructed environment.

# Built-in 5000mAh battery

The 360 X3 comes with a rechargeable battery (5000mAh). You can also choose the hardwired connection for continuous charging. Multiple means of preventing false-positives will help the doorbell to avoid burning through its battery on unnecessary recordings - saving only the most important interactions. Moreover, 360 provides an add-on battery pack that can be used to recharge the doorbell without.

\*The battery pack is sold separately.

# Human detection

Our proprietary algorithms can use the cutting edge image-recognition technology to distinguish between human and other sorts of movement, so you won't get false alarms from falling leaves, vehicles, or animals.

Son

## Featuring facial recognition

The doorbell can actually distinguish between friends, family, or strangers, so you always know who's been to your home.

A man wearing a grey polo shirt, dark trousers, a grey cap, and a lanyard with an ID badge is walking on a light-colored stone-tiled porch. In the foreground, a brown cardboard box sits on a dark blue and white striped rug. The porch has a white balustrade with decorative balusters. The background shows a well-maintained garden with green hedges, trees, and a building with a clock tower in the distance under a clear sky.

## Package detection

The 360 X3 can automatically detect when there's a package at your door and send you real-time notifications. And when someone picks up that package, you'll be instantly notified, too.

Package

# HDR technology

The award-winning HDR (high dynamic range) technology balances contrast, capturing startlingly clear details even in low light conditions or when figures are backlit. With the 360 X3 you'll never be stuck guessing at backlit silhouettes

A woman with long brown hair, wearing a pink cardigan over a white collared shirt and a black skirt, stands outdoors on a paved path. The background shows greenery and a building with a tower. The image is dimly lit, with the woman's face and clothing appearing somewhat washed out due to the lack of HDR.

HDR OFF

The same woman in the same outfit stands in the same outdoor setting. With HDR turned on, the image is significantly brighter and more detailed. The colors are more vibrant, and the background elements like the trees and the building are much clearer and more defined.

HDR ON

A man in a dark hoodie and jacket is walking on a stone path at night. The path is flanked by trees and a white railing. The scene is split into two panels: the left panel is dark, representing a standard night vision doorbell, and the right panel is bright, representing a 360-degree doorbell with night vision. The man is looking towards the right panel.

## Crystal-clear Night Vision

Crystal clear night vision ensures you'll always know who's come knocking at night.

360 doorbell

## Motion recording

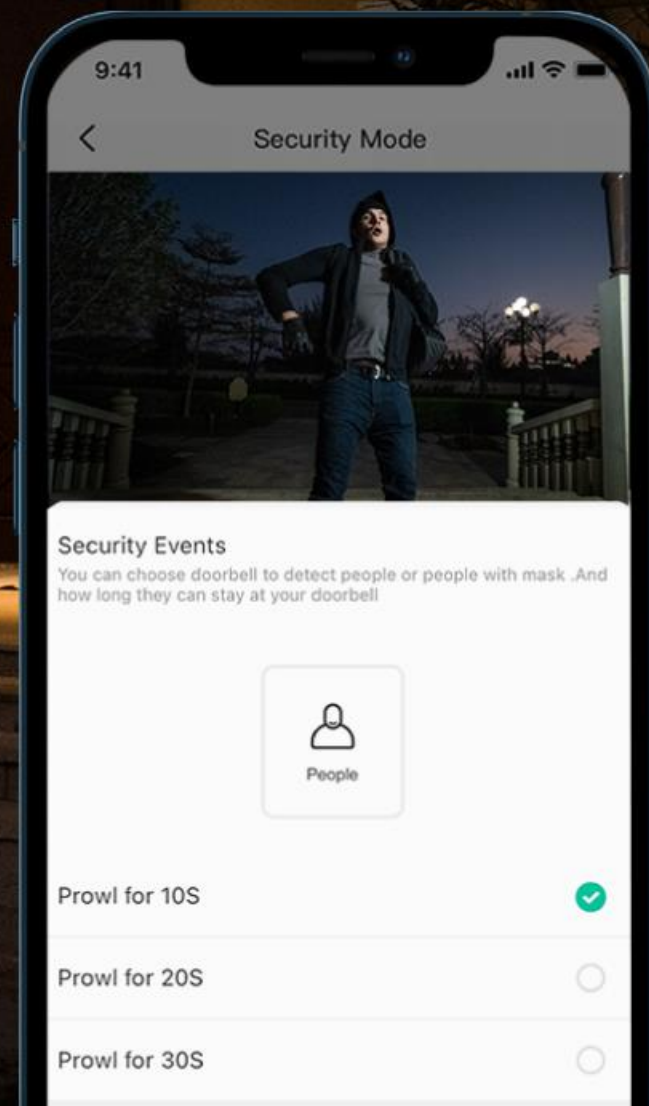

Once something sets off the motion sensors, the 360 X3 immediately activates, capturing 10 to 60 seconds clips and sending them to you, instantly viewable in real-time and available for replay later. If necessary, you can share them or download them to your phone.

## Optional automatic siren

The 360 X3 features the auto-siren to deter suspects that arrive where they aren't supposed to be while you're asleep or away. The 360 X3 will also send you real-time notifications when the siren activates.

Local  
storage

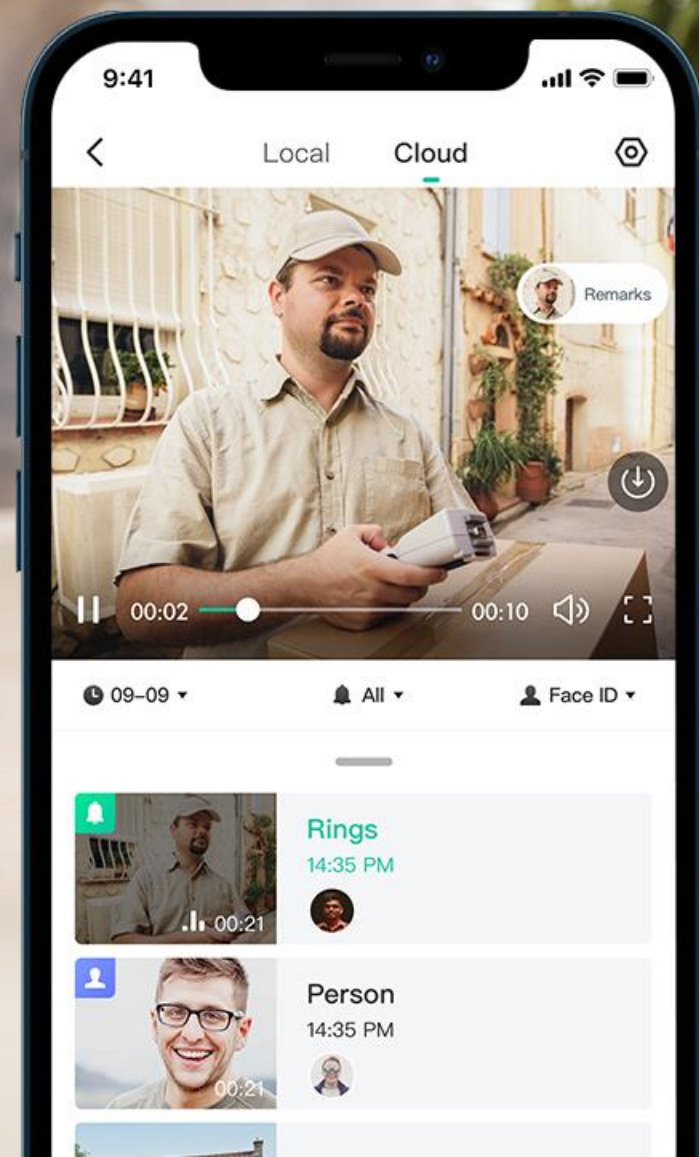

aws

## Data Encryption

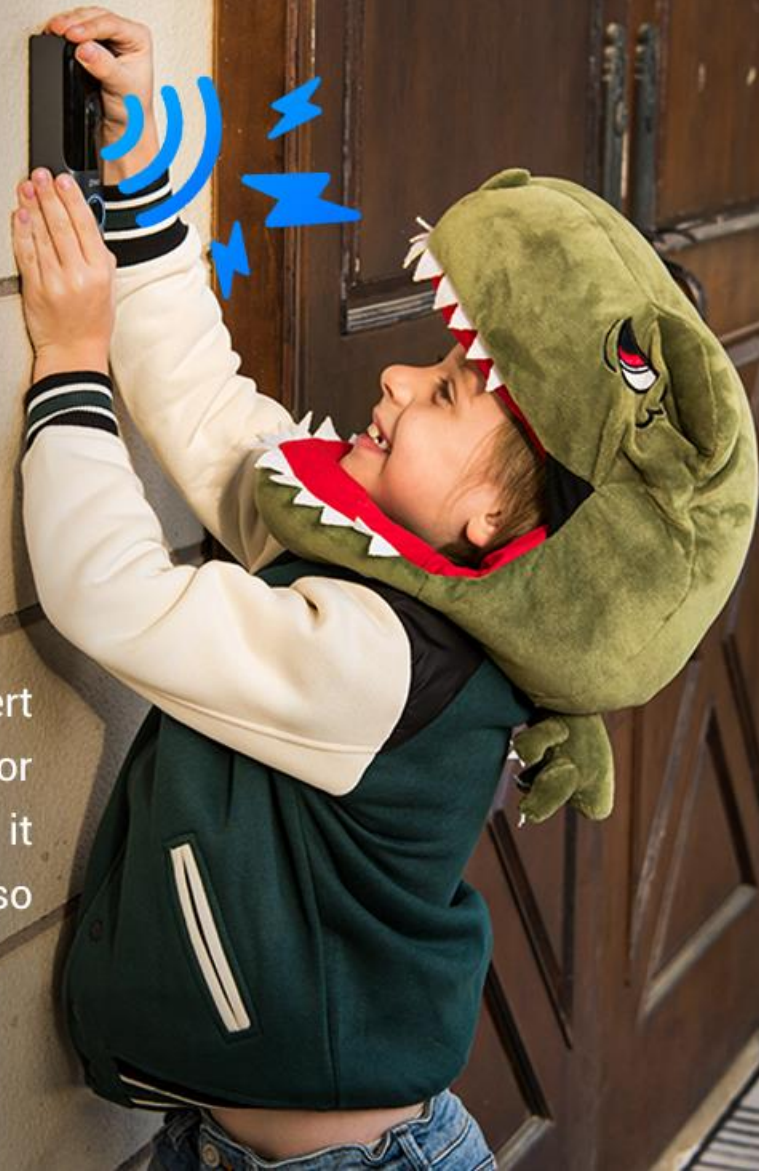

All clips are encrypted with Banking Level Security (Chacha20) before being stored locally, or via cloud if you need more space by using the Amazon AWS server.

## Anti-theft

The doorbell will sound a siren and send an alert to your phone if anyone attempts to remove or disable it without authorization. Additionally, it will record any such attempts as evidence, so there's no chance a criminal can get away.

## Simple set-up

The 360 X3 can be installed in just seconds even by children and does not require professional help. You can choose between easy 3M adhesive installation to avoid damaging your wall, or drill installation for rough all surfaces.

# Can be integrated with a digital assistant

Link your 360 X3 account to a digital assistant like Alexa for easy hands-free use. Check your front door, message, or video chat with your visitors all via voice control. Your digital assistant will instantly notify you when someone approaches and show a live view of your front door on your device whenever someone presses the doorbell.

"Alexa, talk to the front door"

# 360 Video Doorbell X3

- Dimensions: 5.7 in. x 2.0 in. x 1.3 in. (145.1mm x 52.2mm x 32.6mm)
- Weight: 266g
- Color: Space grey
- Resolution: 5 Megapixel
- Aperture: F2.0
- Pixel Resolution: 2496x1920(4:3)
- Motion Zone Range: 30 ft(9m)
- Field of View: 162°

# Power and connectivity

- Hardwired Power: Hardwired to An Existing Doorbell System or Transformer for Continuous Charging(8-24 VAC, 40 VA Max, 50/60Hz)
- Battery: 5000mAh of rechargeable lithium-ion battery
- Operating Conditions: -4°F to 122°F (-20°C to 50°C), Weather resistant

# Wi-Fi Base Station

- Weight: 100g
- Color: Space grey
- Connectivity: IEEE 802.11b/g/n/ac Wi-Fi Connection @ 2.4GHz & 5GHz
- Range:  $\geq 984\text{ft}$  (300M)
- Local Storage: 8G

# Battery Pack

- Color: Space grey
- Capacity: 10000mAh
- Weight: 100g
